Network Configuration Change Request

School Name: St Brigid's Gisborne	**E No:**
Street Address: 68 Aitkin St	**Postcode: 3437**
Suburb: Gisborne	**Date: 15/10/19**
Contact name:Maree Morris (Contact is to be school employee)	**Contact position:Principal**
Contact email: mmorris@sbgisborne.catholic.edu.au	**Contact phone: 03) 5428 2220**
Reason for Request: New Website	

Please Note:
- The server name is the name your server will be known as on the internet ie the web address. i.e. the full name is name.schooldomain (e.g. *web.stmarks.catholic.edu.au*)

Table 1. Inbound - Allowing computers on the internet to connect to your server.

Server		IP Address		Ports *Note. in most cases both columns will be the same 2*		Protocol
Type	**Name 3**	**Internal**	**Source Address.** **Optional Used for special cases 1**	**Port your server is listening on**	**Port advertised to the internet**	**UDP/TCP**

Notes.

- *Source address* is only needed if you want to restrict which hosts on the internet can connect to your server.

- We can forward connections on one *port* to a different port on your server, eg port 80 advertised to the internet but mapped to port 8080 on your server. In some rare cases this may be required.

- *Name* is the DNS name that will be created for this service

-

Table 2. Allowing your server or workstation to connect to the internet on ports which are not allowed by default.

Server		IP Address		Ports	Protocol
Type	*Name*	*Internal Address*	*Destination Address*		*UDP/TCP*

Table 3. DNS record only.

Fully qualified domain name	*Type of record e.g. A, C Name, MX, or TXT*	*IP Address, alias or text*
